GLOBAL DAILY FANTASY SPORTS INC.
NOTES TO THE CONDENSED CONSOLIDATED INTERIM FINANCIAL STATEMENTS
FOR THE SIX MONTHS ENDED JUNE 30, 2017
(Unaudited - Expressed in Canadian Dollars)

1. Nature of Operations

The Company was incorporated on December 2, 1985 under the provisions of the Company Act (British Columbia). On June 17, 2016 the Company changed its name from Lariat Energy Ltd. to Global Daily Fantasy Sports Inc. The Company is listed and its common shares are traded on the TSX Venture Exchange (“TSXV”) under the symbol “DFS”. The Company’s principal office is located at #1305 - 1090 West Georgia Street, Vancouver, British Columbia V6E 3V7 Canada.

The Company’s past principal business activity was the acquisition, exploration and development of petroleum and natural gas interests. Effective December 31, 2015 the Company disposed of its remaining petroleum and natural gas interests and commenced searching for other business opportunities.

On March 16, 2016 the Company announced its intention to change its business and transition to the online daily fantasy sports (“DFS”) industry as a business to business technology provider of DFS software, which will allow its customers the ability to offer a customized and fully-branded DFS product to their clients. On August 17, 2016 the Company received TSXV approval to the change of business. See also Note 5.

As at June 30, 2017 the Company had working capital in the amount of \$3,982,504. These condensed consolidated interim financial statements have been prepared on a going concern basis which assumes that the Company will be able to realize its assets and discharge its liabilities in the normal course of business operations for the foreseeable future. The Company’s operations are funded from equity financings which are dependent upon many external factors and may be difficult to impossible to secure or raise when required. Management considers that the Company has adequate resources to successfully develop its on-line gaming platform and necessary infrastructure and establish future profitable operations. However, the Company recognizes the Company’s objectives and scope of expenditures may change with ongoing results and, as a result, it may be required to obtain additional financing. While the Company has been successful in securing financings in the past there can be no assurance that it will be able to do so in the future. If for any reason the Company is unable to continue as a going concern, it could impact the Company’s ability to realize assets at their recognized values and to meet its liabilities in the ordinary course of business at the amounts stated in the condensed consolidated interim financial statements. These condensed consolidated interim financial statements do not reflect any adjustments related to conditions that occurred subsequent to June 30, 2017.

2. Basis of Preparation

Statement of Compliance

These condensed consolidated interim financial statements have been prepared using accounting policies consistent with International Financial Reporting Standards (“IFRS”), and in accordance with International Accounting Standards (“IAS”) 34, *Interim Financial Reporting*, as issued by the International Accounting Standards Board (“IASB”). These condensed consolidated interim financial statements should be read in conjunction with the audited consolidated financial statements for the year ended December 31, 2016, which have been prepared in accordance with IFRS as issued by the IASB. The accounting policies followed in these condensed consolidated interim financial statements are consistent with those applied in the Company’s financial statements for the year ended December 31, 2016.

Basis of Measurement

The Company’s condensed consolidated interim statements have been prepared on the historical cost basis except for the revaluation of certain financial assets and financial liabilities to fair value. The condensed consolidated interim financial statements are presented in Canadian dollars unless otherwise noted.

8. Financial Instruments and Risk Management

Categories of Financial Assets and Financial Liabilities

Financial instruments are classified into one of the following five categories: fair value through profit or loss (“FVTPL”); held-to-maturity investments, loans and receivables, available-for-sale financial assets and other financial liabilities. The carrying values of the Company’s financial instruments are classified into the following categories:

Financial Instrument	Category	June 30, 2017 \$	December 31, 2016 \$
Cash	FVTPL	4,109,430	5,824,829
Amounts receivable	Loans and receivables	1,633	5,181
Accounts payable and accrued liabilities	Other liabilities	(262,342)	(242,201)

The Company’s financial instruments recorded at fair value require disclosure about how the fair value was determined based on significant levels of inputs described in the following hierarchy:

Level 1 - Quoted prices are available in active markets for identical assets or liabilities as of the reporting date. Active markets are those in which transactions occur in sufficient frequency and value to provide pricing information on an ongoing basis.

Level 2 - Pricing inputs are other than quoted prices in active markets included in Level 1. Prices in Level 2 are either directly or indirectly observable as of the reporting date. Level 2 valuations are based on inputs including quoted forward prices for commodities, time value and volatility factors, which can be substantially observed or corroborated in the market place.

Level 3 - Valuations in this level are those with inputs for the asset or liability that are not based on observable market data.

The recorded amounts for cash, amounts receivable, accounts payable and accrued liabilities and purchase obligation approximate their fair value due to their short-term nature. The Company’s fair value of cash under the fair value hierarchy is measured using Level 1 inputs.

The Company’s risk exposures and the impact on the Company’s financial instruments are summarized below:

Credit Risk

Credit risk is the risk of loss associated with a counterparty’s inability to fulfill its payment obligations. The Company’s credit risk is primarily attributable to cash and amounts receivable. Management believes that the credit risk concentration with respect to financial instruments included in cash is remote.

Liquidity Risk

Liquidity risk is the risk that the Company will not have the resources to meet its obligations as they fall due. The Company manages this risk by closely monitoring cash forecasts and managing resources to ensure that it will have sufficient liquidity to meet its obligations. All of the Company’s liabilities are classified as current and are anticipated to mature within the next fiscal period. The following table is based on the contractual maturity dates of financial assets and the earliest date on which the Company can be required to settle financial liabilities.
