### **1. NATURE AND CONTINUANCE OF OPERATIONS**

Playgon Games Inc. ("Playgon") was incorporated on December 2, 1985, under the laws of the Province of British Columbia. All references in this document to the "Company" refer to Playgon Games Inc. and its wholly owned subsidiaries. The Company is listed and traded on the TSX Venture Exchange ("TSXV") under the symbol "DEAL". The Company's principal office is located at #656 - 1500 West Georgia Street, Vancouver, British Columbia, V6G 2Z6, Canada.

The Company's principal business is the development and licensing of digital content for the growing iGaming market. The Company provides a multi-tenant gateway that allows online operators the ability to offer their customers innovative iGaming software solutions. Its current software platform includes Live Dealer Casino, E-Table games ("Live Dealer Product") and Daily Fantasy Sports ("DFS") which, through a seamless integration at the operator level, allows customer access without having to share or compromise any sensitive customer data.

On June 19, 2020, the Company purchased 100% of the outstanding shares of Playgon Interactive Inc. ("Playgon Interactive"), a company existing under the laws of the Province of British Columbia. Playgon Interactive is in the business of developing online multi-player Live Dealer Casino and E-Table games that streams live casino games with dealers to online players. The acquisition of Playgon Interactive is being accounted for as an asset acquisition under IFRS 3 as Playgon Interactive did not meet the definition of a business (Note 3).

The Company's operations have been primarily funded from equity financings, which are dependent upon many external factors and may be difficult to secure or raise when required on terms acceptable to the Company or at all. As at June 30, 2021 the Company has working capital of \$49,991 (December 31, 2020, working capital deficit - \$1,872,784) and an accumulated deficit of \$37,099,107 (December 31, 2020 - \$30,022,025). The Company recognizes that its objectives and scope of expenditures may change with ongoing results and, as a result, it may be required to obtain additional financing. While the Company has been successful in securing financing in the past, there can be no assurance that it will be able to do so in the future.

On March 11, 2020, the World Health Organization ("WHO") declared coronavirus COVID-19 a global pandemic. In order to combat the spread of COVID-19 governments worldwide, including Canada, have enacted emergency measures including travel bans, legally enforced or self-imposed quarantine periods, social distancing and business and organization closures. These measures will have a significant, negative effect on the economy of all nations for an undeterminable period of time, the extent of which is also uncertain. These factors indicate the existence of a material uncertainty that may cast significant doubt about the Company's ability to continue as a going concern. If for any reason the Company is unable to continue as a going concern, it could impact the Company's ability to realize assets at their recognized values and to meet its liabilities in the ordinary course of business at the amounts stated in the unaudited condensed interim consolidated financial statements.

These condensed interim consolidated financial statements do not include any adjustments relating to the recoverability and classification of recorded asset amounts and classification of liabilities that might be necessary should the Company be unable to continue in existence.

### **2. BASIS OF PRESENTATION**

#### **Statement of compliance**

These unaudited condensed interim consolidated financial statements have been prepared in accordance with International Financial Reporting Standards ("IFRS") as issued by the International Accounting Standards Board ("IASB") applicable to the preparation of interim financial statements, including IAS 34, Interim Financial Reporting. The condensed interim consolidated financial statements should be read in conjunction with the annual consolidated financial statements for the year ended December 31, 2020.

#### 4. OTHER ASSETS

In October 2018 the Company's bank in Malta, Satabank, was directed by the Malta Financial Services Authority ("MFSA") to refrain, cease and desist from taking further deposits into the accounts of its current customers. The MFSA also retained Richard Galea Debono, to take charge of the bank's assets for the purpose of safeguarding the interests of depositors and to assume control of the bank's business. The Company has 46,047 euro (CAD\$67,685) (December 31, 2020 – 46,047 euro (CAD\$71,871)) in a bank account at Satabank and is in the process of transferring these funds to a new bank in Malta. As the funds are not currently available, the cash amount has been categorized as "Other assets" in the consolidated statement of financial position. Dialogue with Satabank is ongoing and the Company anticipates release in full of these funds in 2021.

On December 14, 2020, Devkey Consulting Limited ("Devkey"), a company controlled by the former CFO of Playgon Paul Dever, initiated a civil claim against the Company in the Supreme Court of British Columbia (the "Court") for failure to pay monthly fees and invoiced expenses from July 2018 to August 2020 and an unpaid severance amount upon termination of his consulting contract. The claim was for €231,569 (CAD - \$373,878) and on December 16, 2020, the Court ordered the full amount claimed be garnished from the Company and paid into court until a judgement on the claim is reached. The Company has retained legal counsel regarding this matter and strongly believes the garnishment order will be lifted. As at June 30,

Financial Instrument	Category	June 30,	December 31,

The Company's financial instruments recorded at fair value require disclosure about how the fair value was determined based on significant levels of inputs described in the following hierarchy:

Level 1 - Quoted prices are available in active markets for identical assets or liabilities as of the reporting date. Active markets are those in which transactions occur in sufficient frequency and value to provide pricing information on an ongoing basis.

Level 2 - Pricing inputs are other than quoted prices in active markets included in Level 1. Prices in Level 2 are either directly or indirectly observable as of the reporting date. Level 2 valuations are based

on inputs including quoted forward prices for commodities, time value and volatility factors, which can be substantially observed or corroborated in the market-place.

Level 3 - Valuations in this level are those with inputs for the asset or liability that are not based on observable market data.

The recorded amounts for cash, amounts receivable, sales tax receivable, accounts payable and accrued liabilities, loans payable, purchase obligation payable approximate their fair value due to their short-term nature. The Company's fair value of cash and other assets under the fair value hierarchy is measured using Level 1 inputs. The Company's lease liability is measured as the present value of the discounted future cash flows.

#### **Risk exposure**

The Company's risk exposures and the impact on the Company's financial instruments are summarized below:

a) **Currency risk**

Foreign currency exchange rate risk is the risk that the fair value or future cash flows will fluctuate as a result of changes in foreign exchange rates. The Company's operations are carried out in Canada, the United States, and Malta. As at June 30, 2021, the Company had assets totaling US\$108,545 and liabilities totalling US\$879,810. Additionally, the Company had assets totalling EUR\$135,347 and liabilities totalling EUR\$375,917. These factors expose the Company to foreign currency exchange rate risk, which could have an adverse effect on the profitability of the Company. A 10% change in the exchange rate with the USD would change other comprehensive income/loss by approximately CAD\$100,000 while a 10% change in the exchange rate with the EURO would change other comprehensive income/loss by approximately CAD\$25,000. At this time, the Company currently does not have plans to enter into foreign currency future contracts to mitigate this risk, however it may do so in the future.

b) **Credit risk**

Credit risk is the risk of loss associated with a counterparty's inability to fulfill its payment obligations. The Company's credit risk is primarily attributable to cash and amounts receivable. Management believes that the credit risk concentration with respect to financial instruments included in cash and amounts receivable is remote.

c) **Liquidity risk**

Liquidity risk is the risk that the Company will not be able to meet its obligations as they come due. The Company's ability to continue as a going concern is dependent on management's ability to raise the required capital through future equity or debt issuances but there can be no assurance that such financing will be available on a timely basis under terms acceptable to the Company. The Company manages its liquidity risk by forecasting cash flows from operations and anticipating any investing and financing activities. As at June 30, 2021, the Company had a cash balance of \$2,428,400 to settle current liabilities of \$3,193,023.

d) **Market risk**

Market risk is the risk of loss that may arise from changes in market factors such as interest rates, foreign exchange rates, and commodity and equity prices. These fluctuations may be significant.

## **PLAYGON GAMES INC.**

### **Notes to Condensed Interim Consolidated Financial Statements**

**For the three and six months ended June 30, 2021 and 2020**

**(Unaudited - expressed in Canadian Dollars)**

---

e) Interest rate risk

Interest rate risk is the risk the fair value or future cash flows of a financial instrument will fluctuate because of changes in market interest rates. Financial assets and liabilities with variable interest rates expose the Company to cash flow interest rate risk. The Company does not hold any financial liabilities with variable interest rates. The loans included in loans payable bear interest at rates ranging from 0% to 12% per annum with maturity dates occurring within the next twelve months. The Company does maintain bank accounts which earn interest at variable rates, but it does not believe it is currently subject to any significant interest rate risk.

f) Regulatory risk

The Company is exposed to risk due to the regulatory uncertainty of the online gaming industry. The Company is unable to predict whether regulations will be introduced in the future and if so, whether they could negatively impact the operations of the Company.

#### **Capital Management**

The Company does not have any externally imposed regulatory capital requirements for managing capital. The Company has defined its capital to mean working capital and shareholders' equity, as determined at each reporting date.

The Company's objectives when managing capital are to safeguard the entity's ability to continue as a going concern, so that it can continue to provide returns for shareholders and benefits for other stakeholders. The Company sets the amount of capital in proportion to risk. The Company manages the capital structure and makes adjustments to it in the light of changes in economic conditions and the risk characteristics of the underlying assets. In order to maintain or adjust the capital structure, the Company may issue new shares, or engage in debt financing.
